Please fill in the contract detail sheet, sign and return it to the above email address

Definitions

Preventative Maintenance (PM)

Is a call to inspect your oven and carryout replacement of small service parts and door seals as detailed below

Preventative Maintenance is a visit to check the following

- Function test of all components
- Check of Diagnostics to test for faulty sensors and library of fault codes
- Voltage check, electrical safety test, inspection of connections to first upstream connection
- Check for correct electrical installation (ie size of cable , plugs and MCB)
- Check of door seal, door catch and latch and adjustment of door
- Visual check of racks, rack pins, baffle plate, fan(s) interior cabinet
- Inspection of light(s) and light fittings and seals
- Visual check of door drain channels and associated pipes and seals
- Visual check of hoses, hose connections, steam tank seals, Steam heating element seals
- Check on condition of Steam Transfer Hose and Pump Drain Hose 
- Removal, inspection and cleaning of water level sensor 
- Removal of humidity valve for visual inspection 
- Visual inspection of all other components within side panel of oven
- Power check and correct functions of Steam and Hot-air elements
- Function test of cooking and cleaning cycles
- Discussion with our engineer to summarize further work required and possible improvements that can be made to optimize the usage of your oven

Key Check Point

Preventative Maintenance does not include

It does not cover the replacement of larger components such as Motor, Drain Valve, printed circuit boards, humidity valve, fans, transformers, steam tanks, heating elements.

Any faults found at the time of a PM visit will be scheduled for a recall to fit the required parts and will be deemed to be one of your (1 or 2) free emergency breakdown calls (depending on contract)

Door Seals

A maximum of 2 door seals per oven will be supplied at a discounted rate during your service contract. The discounted seals will be fitted by our engineer and cannot be supplied as a spare part.

Emergency breakdown

Emergency breakdown is separate to a PM call

An emergency breakdown call is a call to rectify a defect reported by you the customer

An emergency Breakdown call is a visit to check faults such as:

- A Dead Oven Oven failing to switch on
- Oven Unresponsive Oven switches on but controls are not working
- Oven Leaking Water detected after a clean or cooking cycle
- Oven Operation fault Oven does not cook as expected
- Other faults Any other fault
- Recall after PM visit To fit parts seen as defective during a PM visit

Procedure

Please check to make sure that there are no issues with your services before placing a service call such as

- Leaking or blocked in-house drain (no water on the stand, water on the floor behind oven)
- Electrics have been switched off at the isolator (without your knowledge)
- Water has been switched off by a plumber or cleaner without your knowledge

To Place an Emergency Breakdown call

Having made sure that the fault is with your oven and not external services please call and speak to either Ray, Shaun or Chris on 07836598713. We will then arrange for your oven to be fixed

Exclusions

Lamps

Please note that interior lamps are not covered by our emergency breakdown service and do not carry any warranty. If you require lamps between service`s you can purchase a pack of 10 lamps which can be sent direct to you from our supplier.

Door Seals

Unless your door seal is causing danger due to steam escape, water on the floor after cleaning, or potential leak into the control panel, seals will only be fitted in a PM visit. Please note only 2 door seals per oven will be supplied at a discounted rate during your service contract. Door seals can only be fitted by our engineer and will not be supplied at a discount as a spare part.

Spares

All spares not included on the (Service spares list) will be charged at Rational UK Spares list price.

A spares price list can be sent at your request

Special order spares (non-van stock spares) such as Oven racks, Baffle plates, Steam generators, Hot air elements will carry a delivery charge.

Please see the spares service price list on the next page

INVOICE PAYMENTS

Invoices for service contracts must be paid in full before ovens can be put on contract cover

Invoices for spares fitted and additional charges during service and breakdown visits must be paid within 30 days of invoice date

Failure to pay spares and additional invoices within the above time frame may cause us to suspend the contract until payment is received
